

## **A report on Water Conservation at surrounding of GDC Dhami at 16 Mile**

NSS Volunteers have made a visit to various local level natural water bodies surrounding of GDC Dhami at 16 miles. There are three natural water bodies at Dhami and at 16 Mile. The NSS Volunteers have done a cleanliness drive in these water bodies and made people aware regarding water conservation and scarcity of water resources. These local natural water resources are used by the local people from ancient times but now there is a need to preserve them for coming generations. Villagers appreciated the work of NSS volunteers regarding their cleanliness drive and awareness programme. The NSS Volunteers have also visited a local citizen Sh. Ramesh, who has made a rain water harvesting tank, which they use for their agriculture purpose and daily needs of household. NSS volunteers also come to know the technic of making rain water harvesting tank from Sh. Ramesh. They also put an awareness drive regarding rain water harvesting in local village named Gandal. These water conservation Programmes are done under project of college named “**Har gaun kuch kehta hai**”. Programme officers of the college **Dr. Gaurav Sharma** and **Dr. Poonam Verma** supervised the cleanliness drive and awareness programme. The photos and pictures of local level water bodies and rain water harvesting are attached with the report.
